# Why partner with Specialist Pharmacy?

## Unrivalled Quality

- ✓ **At Specialist Pharmacy, our quality-driven processes are non-negotiable.** We operate with clinical precision to deliver consistent, compliant and patient-safe formulations, fully aligned with MHRA, GPhC and FSA standards
- ✓ **We've validated every protocol and calibrated every piece of equipment—because consistency starts with control.** Our compounding environment is built for precision, ensuring consistently accurate and reliable formulations.
- ✓ **Our robust QA/QC systems go beyond the basics.** From in-process checks to final product release, we apply continuous scrutiny to guarantee quality before it ever reaches our patients.
- ✓ **We work only with qualified, audited suppliers—no exceptions.** Every ingredient we use comes with full traceability and a Certificate of Analysis (CoA) to back it, ensuring transparency from start to finish
- ✓ **We insist on pharmacopoeia-grade ingredients—BP, Ph. Eur. and USP as standard.** Because therapeutic outcomes depend on uncompromising quality.
- ✓ **We document everything—because full batch traceability isn't optional, it's essential.** Our documentation is thorough, accessible and audit-ready at any time.
- ✓ **Our staff don't just follow SOPs—they're trained to own them.** Every team member is fully competent, operating under strict governance to uphold the highest standards of care.

## Powered by Innovation

- ✓ **We harness advanced formulation technologies to push the boundaries of what's possible.** From APIs to delivery mechanisms and base vehicles, every component is engineered for optimal therapeutic performance.
- ✓ **Scientific excellence drives every decision we make.** Our formulations are grounded in evidence-based research, ensuring every ingredient, dose and delivery method is backed by data and clinical relevance.

At Specialist Pharmacy, we prioritise **patient safety** and **clinical reliability**, delivering evidence-based, personalised formulations with precision and control.

Our operations are guided by a commitment to collaborative partnerships, driven by **quality assurance**, **scientific integrity** and regulatory trustworthiness at every stage of the compounding process.

# The London Specialist Pharmacy and Fagron

Fagron is the world's leading global pharmaceutical compounding company, bringing personalised pharmaceutical care to hospitals, pharmacies, clinics and patients in more than 60 countries worldwide.

Pharmaceutical compounding offers a solution for patients who require medications that have been discontinued by drug manufacturers and helps patients who face a supply shortage of their normal medications. It also allows pharmacists and doctors to work together to create tailor-made medications (such as combination pain therapies or hormone replacement therapies) that are not commercially available.

Specialist Pharmacy, with over 25 years of expertise and acquired by Fagron in 2024, is a full-service compounding pharmacy serving over 30,000 patients across the UK each year. We create high-quality, bespoke medications that prioritise safety, efficacy and patient wellbeing.

With decades of experience, we combine advanced technology, precise testing and tailored delivery methods to ensure every preparation meets the highest quality standards. We carefully select the finest pharmaceutical ingredients to create treatments that are truly customised to each patient's unique needs.

## Our Purpose

# Together we create the future of **personalising** medicine

### TOGETHER

We enable pharmacists, prescribers, hospitals and industry to provide quality, safety and service for their patients.

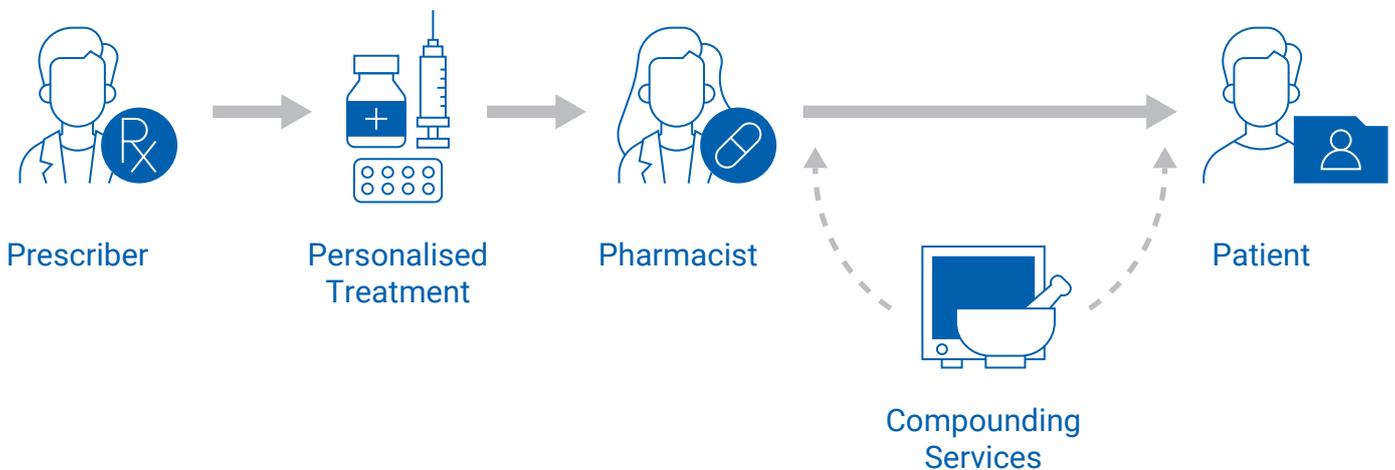

### CREATE

We create value in healthcare by offering a wide range of compounding services and products.

### PERSONALISING

We personalise each patient's treatment through pharmaceutical compounding, increasing effectiveness, quality and safety.

## Together we Create Value

# Quality Focus

## Premium quality ingredients.

Our in-house expertise, quality and safety mechanisms allow us to be able to develop formulations that ensure our products meet all the necessary standards. Fagron's presence in different markets means we have to comply with the different local regulations. With the use of MasterControl quality system, we are able to streamline all quality processes and ensure the same standard process in all facilities, from the supply chain of the raw material, production, quality management, all the way to the customer.

More than 200,000 customers worldwide have access to over 2,500 high-quality pharmaceutical raw materials thanks to Fagron's global product and producer qualification, full analysis of incoming and produced products, GMP (Good Manufacturing Practice) conditioning and release by a qualified person.

## Quality defines who we are and what we do.

At the heart of everything we do is a strong commitment to quality. From sourcing the finest ingredients to ensuring precision in every formulation, we maintain the highest standards across our operations.

Our rigorous quality assurance processes are designed to guarantee safety, efficacy, and consistency, giving our partners and patients complete peace of mind.

# BHRT Creams

Non-sterile Compounding Services

Treating Hormone Imbalance

# BHRT Creams

## Tailored relief from hormonal imbalances.

Our topical **bioidentical hormone replacement therapy** formulations are meticulously compounded to suit the unique requirements of each patient, offering a bespoke solution for managing hormonal imbalance symptoms such as fatigue, weight fluctuations, diminished libido and night sweats.

This personalised approach empowers practitioners to tailor the HRT regimen to address specific concerns, thereby enhancing the overall health and quality of life of their patients.

## HRT Base Cream Innovation

Our BHRT creams are formulated using HRT Heavy™, a hormone therapy topical cream base specifically designed for deep skin penetration and optimal effectiveness in both male and female hormone restoration formulations.

### HRT Heavy™ Benefits

- ✓ Sustained skin penetration
- ✓ Paraben-free
- ✓ Natural ingredients
- ✓ Cosmetically elegant
- ✓ Validated stability/potency of >90 days for all hormone APIs

# BHRT Creams

## Topical BHRT APIs

7-Keto-DHEA

Chrysin

DHEA

Estradiol

Estriol

Pregnenolone

Progesterone

Testosterone

*The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.*

## Bases

**HUMCO HRT Heavy™**  
Non-Oily, O/W Emulsion Cream

**Fagron Pentravan®**  
Vanishing O/W Cream

## Packaging

**30 mL Metered Dose Airless Pump**  
0.3 mL per actuation. 100 doses

**50 mL Metered Dose Airless Pump**  
0.3 mL per actuation. 160 doses

*Maximum 100mg of API/combination per 0.3 mL dose.  
Higher concentrations per 0.5 mL available upon request.*

## Additional Information

Beyond use date: 6 months\*

\* The beyond use date varies depending on the active pharmaceutical ingredients present in the formulation and available stability studies.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# Lozenges

Non-sterile Compounding Services

Personalised Dosing

# Lozenges

Personalised dosing and enhanced absorption for diverse needs

Specialist Pharmacy offers **compounded lozenges**, a unique dosage form ideal for patients seeking targeted medication delivery. Troches or medicated lozenges dissolve slowly in the mouth, allowing medication to bypass the digestive system and enter the bloodstream directly through the oral mucosa.

This versatile dosage form is ideal for treating a variety of conditions, including hormone replacement therapy, erectile dysfunction, supplementation and medication administration for patients with swallowing difficulties.

## Fagron Troche Base SF<sup>®</sup>

Fagron's Troche Base SF<sup>®</sup> is a sugar-free, semi-solid base specifically designed for the compounding of medicated lozenges. It provides a stable and palatable delivery system for buccal or sublingual administration of active pharmaceutical ingredients.

Troche Base SF<sup>®</sup> is ideal for patients requiring sugar-free formulations, such as those with diabetes or those following a low-sugar diet. Its smooth texture, mild flavour and ease of molding make it a preferred choice in pharmaceutical compounding.

# Lozenges

## BHRT Lozenge APIs

7-Keto-DHEA

DHEA

Estradiol

Estriol

Pregnenolone

Progesterone

Testosterone

The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.

## Other Lozenge APIs

New

Amphotericin B

Glutathione

Ketoconazole

Loratadine

Melatonin

Minoxidil

Naltrexone HCl

Nystatin

Oxytocin

Resveratrol

Sildenafil

Tadalafil

Vardenafil

## Bases

**Fagron Troche Base SF®**

Sugar-free PEG Lozenge Base

**LoziMelt SP**

Sugar and PEG-free Lipophilic Melt Base

*LoziMelt SP is a natural, sugar and PEG-free lipophilic troche base developed for the buccal delivery of fat-soluble active ingredients. It melts slowly in the mouth, forming a bioadhesive layer that supports efficient mucosal absorption.*

*Its anhydrous composition makes it ideal for moisture-sensitive APIs, while the creamy texture ensures a patient-friendly experience. LoziMelt SP is particularly well-suited for alternative dosage forms, especially in the delivery of high-dose BHRT lozenge formulations.*

## Additional Information

Beyond use date: 6 months\*

Maximum 400 mg of API/combination per lozenge.

1 Tray = 30 lozenges

½ Tray = 15 lozenges

Dose can be scored into quarters = 120 doses if quartered\*\*

Our standard lozenge flavour is vanilla.

\* The beyond use date varies depending on the active pharmaceutical ingredients present in the formulation and available stability studies.

\*\* Applies to Fagron Troche Base SF® only.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# Rapid Dissolve Tablets

Non-sterile Compounding Services

Personalised Dosing

---

# Rapid Dissolve Tablets

**Quick. Convenient.  
Customised.**

Rapid Dissolve Tablets (RDTs), also known as Orally Disintegrating Tablets (ODTs), are an innovative dosage form **designed to dissolve quickly in the mouth**—no water required. Ideal for patients who struggle with swallowing, experience nausea or require fast-acting relief, RDTs offer both convenience and efficacy.

Customisable in strength, flavour and formulation, they provide an elegant solution for a wide range of therapeutic needs, including hormone therapy, pain management, and more.

---

## Fagron Oro-Tab<sup>®</sup> Diet

### **A Smarter Base for Personalised, Patient-Friendly RDTs**

At Specialist Pharmacy, we use Oro-Tab<sup>®</sup> Diet: a specialised base for orodispersible and sublingual tablets that's engineered for both performance and patient-centred care. Developed to be made through heating, Oro-Tab<sup>®</sup> ensures mechanical strength, rapid disintegration, taste masking and API stability. Its sugar-free composition makes it ideal for patients with insulin resistance, diabetes, dyslipidemia or Metabolic Syndrome.

# Rapid Dissolve Tablets

## BHRT RDT APIs

7-Keto-DHEA

DHEA

Estradiol

Estriol

Pregnenolone

Progesterone

Testosterone

*The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.*

## Other RDT APIs

New

Cetirizine

Fluoxetine

Glutathione

Hydrocortisone

Loratidine

Minoxidil

Naltrexone HCl

Sildenafil

Tadalafil

## Packaging

Nultraviolet Medi-Cup® Blisters provide superior UV protection, blocking over 97% of harmful ultraviolet rays. Their semi-rigid design preserves the physical integrity of medications by preventing powdering, crushing, or breakage. All components are made from FDA-compliant materials, ensuring the highest standards of safety and quality.

## Additional Information

Beyond use date: 6 months\*

Maximum 250 mg of API/combination per RDT.

Pack sizes of 30, 60 and 90.

Our standard RDT flavour is vanilla.

\* The beyond use date varies depending on the active pharmaceutical ingredients present in the formulation and available stability studies.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# Capsules

Non-sterile Compounding Services

## Compounded Capsules

# Capsules

Unlock the potential of compounded capsules.

We provide an extensive portfolio of active pharmaceutical ingredients (APIs) and nutritional supplement ingredients (NSIs) for **precision capsule compounding**, including immediate-release, controlled-release and high-strength formulations tailored to individual patient needs.

Our compounding expertise enables precise dose control, allergen-free formulations, reduced pill burden and optimised adherence, supported by targeted delivery strategies with custom excipient blends.

Compatible with hormones, nutraceuticals and botanicals, our capsule systems ensure optimal bioavailability and truly personalised patient care.

## Fagron DiluCap® Excipient Range

Fagron's DiluCap® range offers specialised excipients for optimising hard-shell capsule compounding.

Tailored for various APIs, it ensures efficient disintegration, stability and bioavailability with formulations for soluble, poorly soluble, hygroscopic and oxidative APIs, as well as modified-release and orodispersible options.

# Capsules

Pomegranate Extract	Vitamin E
Prednisolone	Vitamin K2
Pregnenolone	Zinc Gluconate

The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.

## Additional Information

Beyond use date: 6 months\*

Pack sizes of 30, 60 and 100.

Maximum strength varies per API/combination. Doses above 50 mg may result in a larger capsule size.

All capsule shells are from vegetable origin. Immediate release, slow release and high strength formulation options are available with most ingredients.

\* The beyond use date varies depending on the active pharmaceutical ingredients present in the formulation and available stability studies.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# Orodispersible Films

Non-sterile Compounding Services

Advanced Drug Delivery

---

# Orodispersible Films

Rapid  
transmucosal  
delivery.

Orodispersible Films (ODFs) are a modern dosage form designed to **dissolve rapidly in the mouth without the need for water**. These films deliver active pharmaceutical ingredients (APIs) through the oral mucosa, offering an ideal solution for patients with swallowing difficulties, including paediatrics and geriatrics.

ODFs provide quick, efficient drug absorption and enhance patient compliance with their convenience and ease of use.

---

## Introducing Fagron OrPhyllo®

### A Thin Line Between You and Better Medication

OrPhyllo® is an innovative base specifically developed for compounding ODFs. It ensures rapid disintegration in under 30 seconds and provides high stability, making it compatible with a wide range of APIs. Made from natural polymers and with low water activity (0.49 aw), OrPhyllo® is versatile enough for mono-layer or double-layer films and can be adapted into a mucoadhesive base.

It is also compliant with USP, EP and EFSA standards, ensuring reliability and safety in pharmaceutical compounding.

# Orodispersible Films

## ODF APIs/NSIs

New

Ascorbic Acid	Ketoprofen	Pyridoxine HCl
Baclofen	Lidocaine HCl	Resveratrol
Benzocaine	Loratadine	Sildenafil
Caffeine	Melatonin	Simvastatin
Cetirizine HCl	Minoxidil	Tadalafil
DHEA	Naltrexone HCl	Testosterone*
Glutathione	Progesterone*	Vardenafil

The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.

## Packaging

### Multi-Dose

Reclosable holder, designed for multiple doses.

### Unit-Dose

Non-reclosable sachets, designed for single use.

All films are wrapped in parchment paper to avoid sticking.

## Application Areas

Oral  
(over-the-tongue)

Buccal

Sublingual\*  
(under-the-tongue)

\* Progesterone and Testosterone are specifically designed for sublingual application.

## Additional Information

Beyond use date: 6 months\*\*

Available in two pack sizes: single-use sachets (unit-dose) or 30-unit reclosable holders (multi-dose).

Maximum strength varies per API/combination.

\*\* The beyond use date varies depending on the active pharmaceutical ingredients present in the formulation and available stability studies.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# Sublingual Drops and Suspensions

Non-sterile Compounding Services

Flexibility in Patient Care

# Sublingual Drops and Suspensions

Delivering flexibility in patient care.

Specialist Pharmacy is committed to supporting prescribers with flexible and targeted treatment options. Our carefully selected range of dosage forms includes **sublingual drops for rapid absorption and oral suspensions**, which are particularly well-suited for geriatric patients and those with swallowing difficulties.

These formulations support the development of individualised treatment plans, helping prescribers optimise therapeutic outcomes and enhance patient adherence.

## Fagron Unispend® Anhydrous

Unispend® Anhydrous is a preservative-free, ready-to-use oral suspension base specifically formulated for the efficient compounding of personalised medications. Its anhydrous composition enhances the stability of moisture-sensitive active ingredients, and it is available in both sweetened and unsweetened variants.

Suitable for sublingual drops and oral suspensions, Unispend® ensures consistent dosing, a pleasant taste and improved patient compliance.

# Sublingual Drops and Suspensions

## Sublingual Drops APIs

DHEA	Pregnenolone
Estradiol	Progesterone
Estriol	Testosterone
Naltrexone HCl	

The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.

# Dermatology

Non-sterile Compounding Services

Advanced Dermatological Care

# Dermatology

## Advanced dermatological care.

Specialist Pharmacy Advanced Derma ensures continuous care for the skin during the exacerbation and maintenance phases and guarantees **maximum patient comfort for optimal compliance and results.**

We prepare a variety of topical gels, creams, lotions, ointments and serums to assist patients with the management of dermatological conditions. Our compounding pharmacists work with healthcare providers to deliver a customised dermatology solution that addresses each patient's specific skin condition, treatment goals and sensitivities.

Our vehicles or bases are skin-friendly and suitable for use on sensitive and vulnerable skin. The gentleness, skin feel and visual appeal of each vehicle helps to improve patient compliance and quality of life.

## Fagron Advanced Derma Bases

All vehicles are developed and scientifically tested to help our pharmacists compound stable preparations with a broad range of active pharmaceutical and dermatological ingredients.

Fagron's unique advanced derma vehicles (or base) do not cause skin irritation or long-term adverse or allergic reactions and are free of harmful, obsolete and controversial ingredients.

# Dermatology

# Pain

Non-sterile Compounding Services

Personalised Pain Treatment

# Pain

## The solution for pain.

Over the past 15 years, robust scientific and clinical evidence has confirmed that **topical pain treatments are both effective and well-tolerated**.

Topical therapies have been shown to effectively relieve pain, improve physical function and enhance overall quality of life.

Delivering APIs directly to the site of pain, topical formulations offer multiple advantages:

- Targeted action at the pain source
- Minimal systemic absorption and reduced risk of side effects
- Ability to combine APIs with different mechanisms of action
- Complementary use alongside oral medications

In addition to transdermal applications, we also compound rectal suppositories and creams for pain management.

## SaltStable LO™

SaltStable LO™ is a lecithin-based transdermal cream base specifically designed for pain management preparations. Ideal for compounding high concentrations of hydrophilic active ingredients, it offers excellent stability and enhanced skin penetration without the greasiness typically associated with traditional PLO gels.

With its smooth, cosmetically elegant texture and proven efficacy in delivering analgesic and neuropathic agents, SaltStable LO™ is a versatile choice for creating customised topical formulations that provide effective relief and improved patient compliance.

# Haircare

Non-sterile Compounding Services

Treating Hair loss

# Haircare

Experience regrowth confidence.

Our **personalised compounded hair loss treatments** effectively treat Alopecia or hair loss in men and women of all ages. Alopecia comprises all types of hair loss, from the scalp to any part of the body, whether localised or diffused.

The most common types of alopecia include:

- **Androgenetic Alopecia**  
Hair loss caused by an abnormal increase of androgens in the hair follicles.
- **Alopecia Areata**  
Autoimmune hair loss caused by a collapse of hair follicle immune privilege.
- **Telogen Effluvium**  
A transient form of hair loss characterised by abnormality of the hair cycle with excessive loss of telogen hairs after a triggering event such as medication and stress.

## Fagron TrichoConcept®

TrichoConcept® is a scientifically advanced range of compounding bases designed specifically for personalised hair and scalp treatments. Powered by patented TrichoTech™ technology—a natural phytocomplex that supports the hair bulb, shaft and scalp—this versatile line includes innovative vehicles such as TrichoSol™, TrichoFoam™, TrichoWash™, TrichoCond™ and more.

Each base is expertly formulated to enhance the efficacy of active ingredients, improve patient compliance and deliver optimal results in the treatment of alopecia and other hair concerns.

Suitable for use across a range of APIs and DCIs, TrichoConcept™ sets a new standard in tailored dermatological care.

Nutrition Reimagined

# SP Health Range

The future of nutritional support.

Designed to elevate the standards of nutritional supplementation, our premium products go beyond traditional offerings to address specific health needs and support overall well-being.

From effective weight management solutions to mitochondrial support and tailored lifestyle enhancements, Specialist Pharmacy's Health Range delivers targeted benefits with precision and excellence.

Each product is thoughtfully developed using the finest ingredients, ensuring optimal efficacy and purity.

## Our Health Solutions Range

### Weight Management

Discover our nutritional supplements designed to support weight management goals, including natural appetite suppressants and thermogenic support.

### Gut Health

Promote digestive wellness with our specialised range of gut health nutritional supplements that help support a healthy and balanced gut.

### Mitochondrial Support

Fuel cellular energy and vitality with our targeted mitochondrial support supplements, formulated to optimise mitochondrial function.

# SP Health Range

## Nutritional Supplements

New

### Akkermat™

#### Metabolic Support and GLP-1 Boost

Chili pepper extract standardised to 2% capsaicinoids (including capsaicin, dihydrocapsaicin and nordihydrocapsaicin) encapsulated into a fenugreek extract matrix, rich in galactomannan, utilising FENUMAT™ technology to create a time-released effect and enhanced bioavailability in a form of beadlets.

### GreenSelect™

#### Advanced Thermogenic Support

GreenSelect™ is a caffeine-free green tea extract enhanced with phytosome technology to boost the absorption of catechins and EGCG. Clinically shown to support antioxidant activity and thermogenesis, it aids in reducing body weight, BMI, waist circumference and metabolic markers, especially when paired with a calorie-controlled diet and exercise.

### Motility™

#### Natural Gut Wellness

Motility™ is a plant-based digestive health supplement formulated to support the gut-brain axis. It combines extracts from okra pod (*Abelmoschus esculentus*) and winter cherry root (*Withania somnifera*, commonly known as ashwagandha). This blend is designed to promote a healthy gut microbiome, enhance bowel regularity and improve mood, stress management, sleep quality and energy levels. Clinical studies have shown that Motility™ can increase bowel movement frequency from three to seven times per week within seven days of use, without the side effects commonly associated with laxatives.

### Ormonelle™

#### Menopausal Harmony

Ormonelle™ is a nutraceutical formulation developed to support women through all stages of hormonal change—from the reproductive years to post menopause. Its unique formulation, containing 3% trigonelline and 40% saponin heterosides, targets three key areas: gentle estrogenic activity, DHEA support and SHBG modulation. Designed to work in harmony with the body's natural rhythms, Ormonelle™ offers support for comfort, emotional stability, restful sleep patterns and an overall sense of wellness.

### Neuro SLT

**The First and Only Sublingual B-NAD and Niacin Tablet**  
Neuro SLT is a breakthrough innovation in NAD<sup>+</sup> supplementation, uniquely formulated as the first and only sublingual tablet combining B-Nicotinamide Adenine Dinucleotide (B-NAD) with Niacin. Engineered for rapid dissolution and maximum mucosal absorption, this orange-flavoured tablet delivers enhanced bioavailability compared to traditional oral forms. The sublingual route bypasses first-pass metabolism, supporting efficient systemic uptake of B-NAD, making Neuro SLT the ideal companion to NAD-based treatments and longevity protocols.

### ResviTech™

#### 24-hour Resveratrol

ResviTech™ is a breakthrough resveratrol formulation that uses patented Hybrid-FENUMAT technology to enhance oral bioavailability. By integrating Resveratrol micelles into a fenugreek galactomannan hydrogel matrix, it creates a three-dimensional polymer network that ensures sustained release, an extended half-life, and 10x higher bioavailability, delivering Resveratrol in its active free form in plasma.

Empower Your Wellbeing

# Longevity

## Personalised compounding for a longer life.

In the evolving landscape of modern medicine, longevity and healthy ageing are taking centre stage. Patients are seeking advanced, evidence-backed approaches that not only extend lifespan but enhance quality of life.

At Specialist Pharmacy, we proudly support prescribers with a comprehensive range of compounded formulations and prescription-only medicines designed to **optimise cellular function, mitigate age-related decline and support hormonal and metabolic balance.**

Whether you are formulating for mitochondrial support, hormone restoration, cognitive resilience or cellular detoxification, our portfolio empowers you to meet the nuanced needs of longevity-focused care.

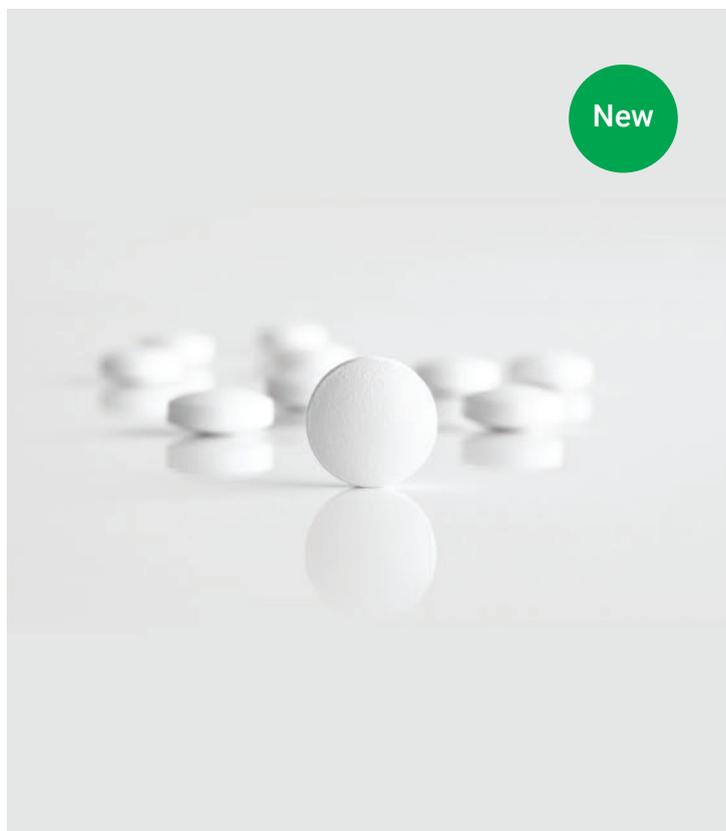

## Introducing Neuro SLT

### The First and Only Sublingual B-NAD and Niacin Tablet

Neuro SLT is a breakthrough innovation in NAD+ supplementation, uniquely formulated as the first and only sublingual tablet combining B-Nicotinamide Adenine Dinucleotide (B-NAD) with Niacin.

Engineered for rapid dissolution and maximum mucosal absorption, this orange-flavoured tablet delivers enhanced bioavailability compared to traditional oral forms.

The sublingual route bypasses first-pass metabolism, supporting efficient systemic uptake of B-NAD—making Neuro SLT the ideal companion to NAD-based treatments and longevity protocols.

# Longevity

## Longevity APIs/NSIs

## APPLICATIONS

7-Keto-DHEA	Metabolic support. Cortisol modulation. Fat metabolism.
Ascorbic Acid	Hormonal optimisation. Adrenal support.
Biotin	Antioxidant. Collagen synthesis. Immune function.
B-Nicotinamide Adenine Dinucleotide	Cellular health. Hair, nail and skin support.
Calcium Pantothenate	Mitochondrial health. Cellular energy. DNA repair.
DHEA	Adrenal and energy support.
Estriol	Menopausal symptom relief. Skin and hair rejuvenation.
Finasteride / Dutasteride	Prevention of age-related hair loss.
Glutathione	Cellular detoxification. Oxidative stress reduction.
Kojic Acid / Azelaic Acid / Hydroquinone / Niacinamide	Hyperpigmentation. Anti-inflammatory skin support.
Levothyroxine	Thyroid hormone replacement for ageing thyroids.
Liothyronine	Active thyroid hormone. Metabolism and energy.
Melatonin	Sleep. Circadian regulation. Antioxidant effects.
Methylene Blue	Mitochondrial support. Cognitive enhancement. Antioxidant.
N-Acetylcysteine	Antioxidant. Glutathione precursor. Detox.
Naltrexone HCl	Immune modulation. Inflammation control.
Niacinamide	NAD <sup>+</sup> support. DNA repair. Inflammation modulation.
Pregnenolone	Neuroprotection. Memory. Hormone precursor.
Progesterone	Hormone balance. Neuroprotection.
Simvastatin	Anti-inflammatory. Endothelial function.
Sirolimus	mTOR inhibition. Autophagy activation. Immune modulation.
Sodium Hyaluronate	Skin hydration. Anti-ageing skincare formulations.
Spironolactone	Androgen control in women. Skin and cardiovascular ageing.
Tadalafil	Vascular health. Endothelial support. Sexual function.
Testosterone	Hormone optimisation in andropause.
Tretinoin / Isotretinoin	Skin cell turnover. Anti-wrinkle. Photoageing.

*The bioidentical hormones used in our compounded medications at Specialist Pharmacy are derived from soy or yam. If the patient has allergies, please contact us to discuss alternative options.*

# Anti-ageing

Non-sterile Compounding Services

Empower Your Wellbeing

---

# Anti-ageing

## Targeting the biology of ageing.

Anti-ageing medicine has evolved beyond surface-level treatments to embrace a deeper understanding of cellular ageing, skin regeneration and hormonal decline.

At Specialist Pharmacy, we offer bespoke compounded solutions designed to **address the visible signs of ageing** and the underlying biological mechanisms that drive it. Whether it's restoring skin integrity, balancing hormones or enhancing antioxidant defence, our formulations are tailored to the individual needs of each patient.

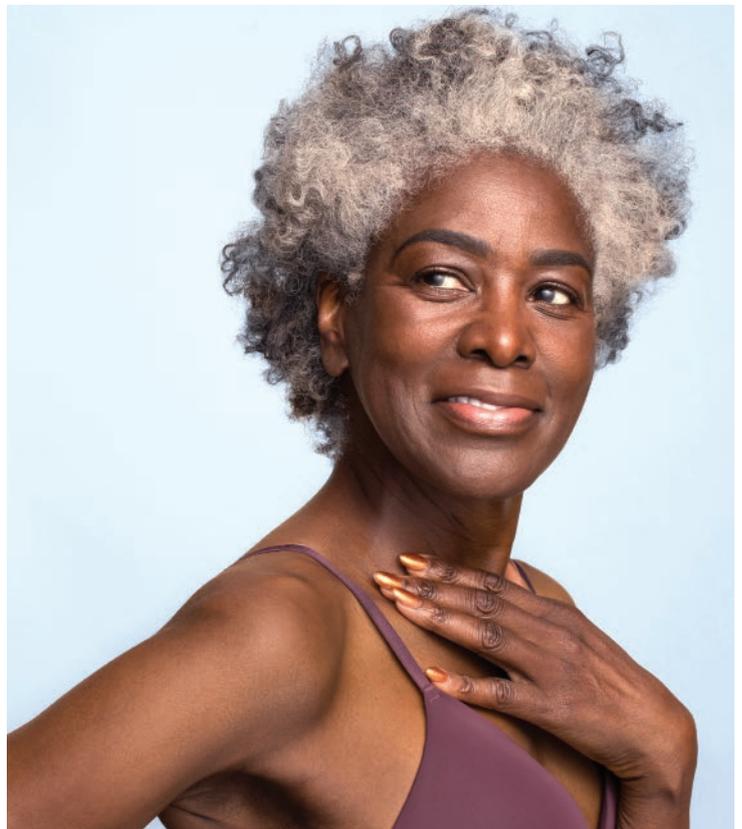

With access to advanced actives and pharmaceutical-grade bases, we are equipped to support prescribers in delivering **effective, personalised anti-ageing treatments**.

Our compounds are ideal for integrative and aesthetic protocols, including dermatological rejuvenation, hormone replacement and cellular defense strategies.

- Fagron TeloTest™
- Fagron AcneTest™
- E3 Face Cream
- E2 Face Cream
- Progesterone Face Cream

# Anti-ageing

## Anti-Ageing APIs/DCIs

## APPLICATIONS

7-Keto-DHEA	Metabolism support. Fat reduction. Hormone balance.
Argireline	Peptide. Reduces wrinkles. Improves skin smoothness.
Biotin	Skin, hair and nail health. Cellular metabolism.
B-NAD	NAD <sup>+</sup> replenishment. Cellular energy. DNA repair.
DHEA	Hormone precursor. Skin thickness. Energy and libido.
Estradiol	Collagen production. Moisture retention.
Estriol	Enhances skin elasticity and hydration. Reduces wrinkles.
Ferulic acid	Protects against UV damage. Improves skin tone and texture.
Glutathione	Antioxidant. Skin brightening. Detoxification.
Hydroquinone	Reduces age spots. Hyperpigmentation correction.
Kojic Acid / Hydroquinone / Azelaic Acid	Skin depigmentation. Even skin tone.
L-Carnitine	Mitochondrial support. Fat metabolism. Energy production.
Liothyronine T3 / Levothyroxine T4	Thyroid support. Metabolism regulation. Skin and hair vitality.
Melatonin	Sleep regulation. Antioxidant. Skin repair during rest.
Metformin	mTOR modulation. Cellular senescence reduction.
N-Acetylcysteine	Antioxidant. Glutathione booster. Detoxification.
Progesterone	Hormone balance. Skin elasticity. Energy and mood support.
ResviTech™	SIRT1 activation. Antioxidant. Cellular longevity support.
Sermorelin	Growth hormone stimulation. Muscle support. Skin firmness.
Tretinoin / Hyaluronic Acid / Niacinamide	Skin rejuvenation. Wrinkle reduction. Hydration.
Vitamin B <sub>3</sub>	Skin barrier repair/ NAD <sup>+</sup> support. Wrinkle improvement.
Vitamin B <sub>5</sub>	Skin hydration. Wound healing. Anti-inflammatory.
Vitamin C	Collagen synthesis. Antioxidant. Skin brightening.
Vitamin E	Skin repair. Antioxidant. Moisturisation.

# Prescription Only Medicines

Reliable supply.  
Competitive pricing.  
Quality care.

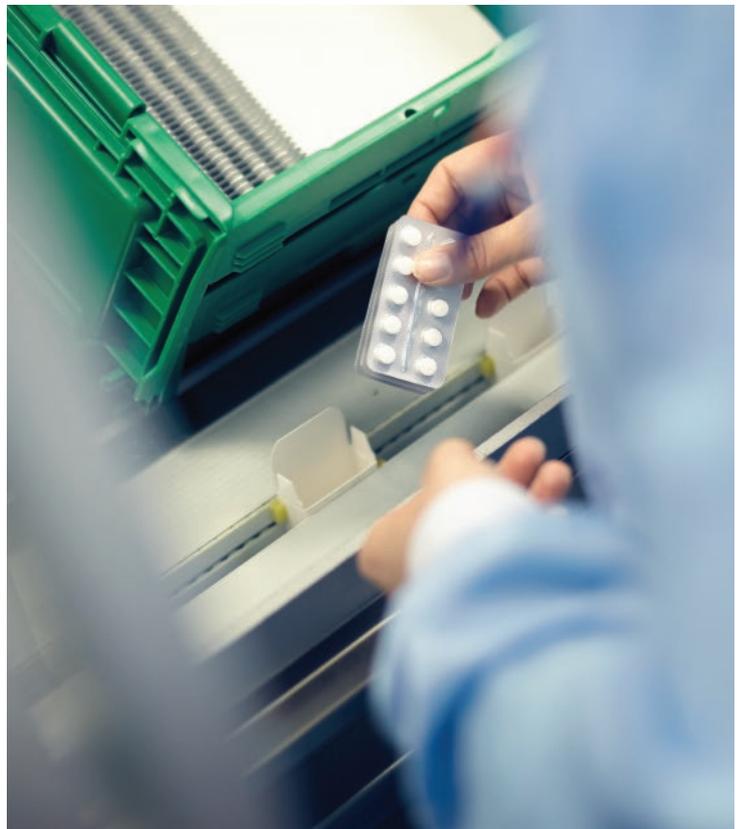

Specialist Pharmacy offers a comprehensive and carefully curated selection of **high-quality Prescription Only Medicines** (POMs), covering a wide range of therapeutic areas to support the needs of healthcare professionals and their patients. Our commitment to quality, regulatory compliance and reliable supply ensures seamless access to essential treatments.

In addition to our regularly stocked inventory, we offer flexible and efficient sourcing solutions to meet a broad range of prescribing needs. We can supply all licensed POMs available in the UK, as well as unlicensed imported 'specials' when clinically required, ensuring timely access to treatments beyond standard availability.

We also offer market-related and highly competitive pricing, helping providers deliver safe, personalised care without compromising on value.

Solutions For Animal Care

# Veterinary Compounding

## Solutions for animal care.

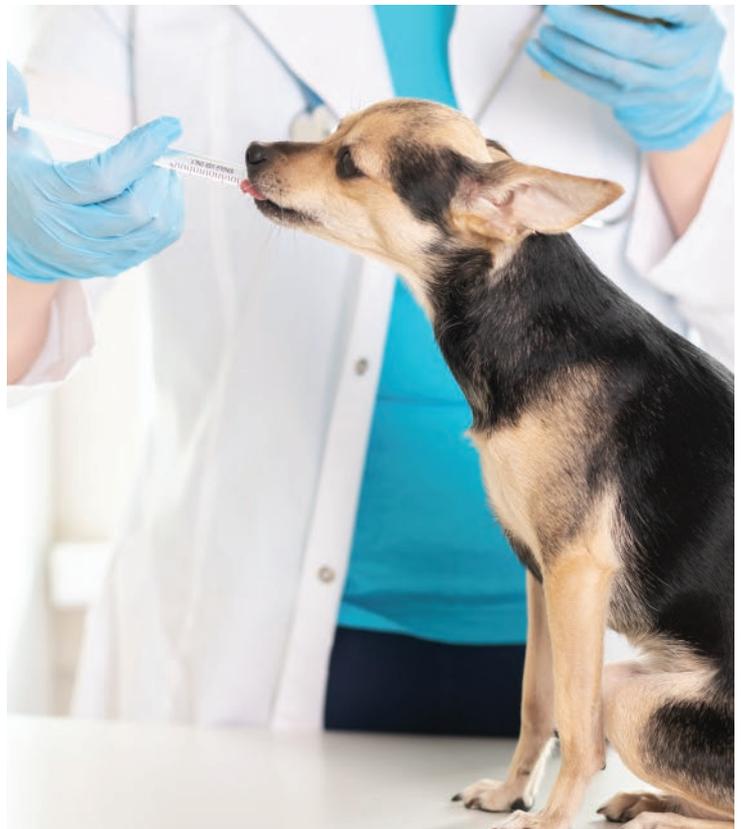

Animals often have unique therapeutic needs that cannot be fully addressed by commercially available medications. This is especially true when a prescribed drug is unregistered for veterinary use or when the animal refuses to take the medication—common among pets like cats, who are notoriously selective.

In such cases, compounding provides **an effective solution to meet veterinary medical needs** and enhance treatment compliance. Our Veterinary line offers a comprehensive range of specialised bases for preparing personalised compounded medications, specifically designed for animal patients.

Whether it's an oral liquid or a transdermal application, our solutions are developed to improve administration and ensure optimal therapeutic outcomes. Specialist Pharmacy's veterinary compounding range empowers veterinarians and pharmacists to deliver better, more compliant care for animals.

## Popular Prescriptions

- Amitriptyline Cream
- Fluoxetine Gel
- Enalapril Suspension
- Azithromycin Capsules

# Veterinary Compounding

## Veterinary APIs

Acetaminophen	Melatonin
Amitriptyline HCl	Metformin
Azithromycin	Metronidazole
Atenolol	N-Acetylcysteine
Baclofen	Naltrexone HCl
Caffeine	Piroxicam
Clindamycin HCl	Prednisolone
Dexamethasone	Pyridoxine HCl
Diclofenac Sodium	Sildenafil
Doxycycline	Simvastatin
Enalapril	Verapamil HCl
Famotidine	
Finasteride	
Fluconazole	
Fluoxetine HCl	
Hydrocortisone	
Ketoconazole	
Ketoprofen	

## Bases

### Fagron SyrSvet™

A ready-to-use oral compounding vehicle for animals, ideal for creating palatable suspensions or, with carboxymethylcellulose, a paste. Compatible with over 110 APIs, SyrSvet™ ensures flexibility and reliability in veterinary formulations.

### Fagron UniSpend Anhydrous®

A water-free, plant-based oral suspension vehicle made with oxidation-resistant medium-chain triglycerides. Ideal when aqueous stability is uncertain, with a BUD of up to 90 days at room temperature per USP <795>.

### Fagron Pentravan®

An oil-in-water emulsion designed specifically for compounding transdermal formulations—ideal when oral administration is not possible or preferred.

## Additional Information

At Specialist Pharmacy, safety comes first—that's why all vehicles in our Veterinary line are formulated without toxic ingredients, allergens or irritants, ensuring safe and gentle treatment for animal patients.

Beef and chicken flavour options are available for suspension formulations.

A full ingredient list of our bases, capsule excipients and shells (including allergen statement) is available upon request. Prescription-only named-patient unlicensed preparations should only be considered when all licensed options have been evaluated and there are no other suitable alternatives. Terms and conditions apply.

# TrichoTest™

Non-sterile Compounding Services

Fagron Genomics

# TrichoTest™

## The genetic test for personalised hair loss treatment.

Studies show there is a relationship between the patient's genetic profile and how their hair loss responds to different types of treatment.

This means that not all hair loss treatments work for every patient, and the success of any given treatment depends on their genetic profile and lifestyle factors.

Thanks to the unique genetic analysis performed by Fagron TrichoTest™, practitioners can **identify which hair loss treatments are most likely to provide the best results** for a patient without guessing or testing different products.

## The Pharmacogenetic Approach

### Genetic Precision

A full report with the explanation of patient genetic characteristics and their relationship with hair loss treatment is provided to practitioner.

### Patient Personalisation

Together with the practitioner, the report can be safely used to formulate an informed personal treatment plan, knowing the selected options are most likely to provide the best outcome for hair loss.

### Specialist Support

Provides practitioners with a deep understanding of the patient's genetic characteristics and how they relate to their hair loss.

### Scientifically Validated

The analysis used in Fagron TrichoTest™ has been scientifically validated by global research. As medical evidence develops and further information becomes known, the report may be updated at no additional cost.

# TeloTest™

Non-sterile Compounding Services

Fagron Genomics

# TeloTest™

## Fight ageing with telomere analysis.

TeloTest™ is **a genetic test for telomeric length analysis**. Telomeres are DNA structures (TTAGGG tandem repeats) found at the end of chromosomes. They protect those chromosomes from errors that can happen during the cell-division cycle and against external and internal damaging agents.

Telomeres shorten in every cell-division cycle, and that decrease in length is directly associated with human ageing. In cases of early ageing, telomeric length is often detected as shorter than expected, providing information about the degree of cellular ageing of the body. Longer telomeres are related to increased lifespan and delayed development of age-related diseases.

## Determine Cellular Age and Tailor Anti-ageing Treatments

TeloTest™ assists healthcare professionals in making informed decisions about age prevention strategies.

Utilising an automated, qualitative algorithm, TeloTest™ calculates telomere length, infers biological age based on this measurement and interprets results alongside the patient's medical history.

This process allows for tailored recommendations on the most effective formulas and advice to help slow the effects of ageing in both adult men and women.

TeloTest™ ensures the most appropriate formula is recommended to effectively delay the ageing process.

# AcneTest™

Non-sterile Compound

Fagron Genomics

# AcneTest™

## Genetic insights for personalised acne treatment.

Fagron AcneTest™ is a pharmacogenomic test powered by an advanced algorithm that analyses genetic predispositions related to skin characteristics. It provides personalised insights to **guide and enhance the effectiveness of acne treatment**.

The test evaluates a panel of 60 single nucleotide polymorphisms (SNPs) related to:

- Sebum production
- Pigmentation
- Inflammation
- Hormone conversion
- Scar tissue formation
- Metabolic rate
- Response to treatment drugs
- Response to nutritional approach

## Personalise the Treatment of Acne

The AcneTest™ report includes personalised treatment based on the analysis of the following categories:

- Acne predisposition
- Skin condition and inflammation
- Nutritional approach
- Pharmacogenetics
- Hormonal approach

The clinically actionable insights provided support healthcare professionals in making more informed, precise and effective treatment decisions.

Fagron Genomics

# Sport Test™

## Understanding genetic influence on athletic performance.

Athletic performance is a multifactorial trait influenced by genetics, body composition, strength, endurance, cognitive ability and injury susceptibility.

Research has identified specific single nucleotide polymorphisms (SNPs) associated with traits like power and endurance, particularly in elite athletes. In fact, genetic factors account for 30% to 80% of the variability in sports performance between individuals.

The Fagron Sport Test™ provides **key insights to support the development of personalised training plans** tailored to an individual's genetic profile.

These results empower healthcare professionals and sports medicine specialists to guide athletes toward achieving peak performance while prioritising long-term health and injury prevention.

## Maximise Athletic Potential

The AcneTest™ report includes personalised treatment based on the analysis of Fagron Sport Test™.

The Fagron Sport Genetic Test analyses 25 genetic variants to identify individual predispositions and potential risks related to athletic performance.

To create the most effective personalised training plan, these genetic insights should be combined with physical factors—such as age, gender, BMI and VO<sub>2</sub> max—and behavioural aspects like diet and exercise habits.

Whether professional or recreational, all athletes can benefit from this advanced genetic testing to enhance performance, optimise training and reduce the risk of injury.

# Nutrigen™

Non-sterile Compounding Services

## Fagron Genomics

# NutriGen™

## Professional nutrigenomic advice.

Fagron NutriGen™ is an innovative genetic test designed to support **personalised weight loss planning through advanced nutrigenetic analysis**. It is the most comprehensive test of its kind, analysing 384 genetic variations related to weight loss, response to exercise, food intolerances and nutrient metabolism, among other key factors.

Available exclusively through healthcare professionals, Fagron NutriGen™ offers unique insights into a patient's nutritional metabolism, enabling truly individualised care.

The test also generates a personalised diet plan based on an advanced algorithm that evaluates more than 850 foods to support optimal dietary choices. Built on cutting-edge DNA microarray technology, Fagron NutriGen™ delivers over 99% reproducibility and sensitivity, ensuring highly accurate and reliable results.

## Personalised Nutrition and Weight Loss Plans

NutriGen™ provides a comprehensive analysis by combining genetic data with extrinsic factors gathered through patient anamnesis, offering deep insights into the underlying causes of weight gain.

The test evaluates genetic variations across eight key categories including macronutrient and micronutrient metabolism, hormonal and inflammatory profiles, physical activity response, intolerances, detox capacity and genetic predisposition to overweight.

This information is used to generate a personalised diet plan tailored to the individual's genetic profile, including the most effective diet type (low-fat, low-carb, or low-calorie), suggested daily intake from over 850 foods and beverages, and the removal of high intolerance risk items.

# Fagron Academy

## Video Platform

The knowledge centre for personalised medicine.

Fagron is a leading global pharmaceutical organisation committed to personalising medicine through modern pharmaceutical compounding, enabling prescribers and pharmacists to formulate medication that satisfies the patient's individual needs, using products developed and tested with a superior level of scientific evidence.

With the ambition to extend our science-based approach in pharmaceutical compounding to online educational resources, ensuring the technical and scientific rigor of the content we provide, we have developed Fagron's Video Platform.

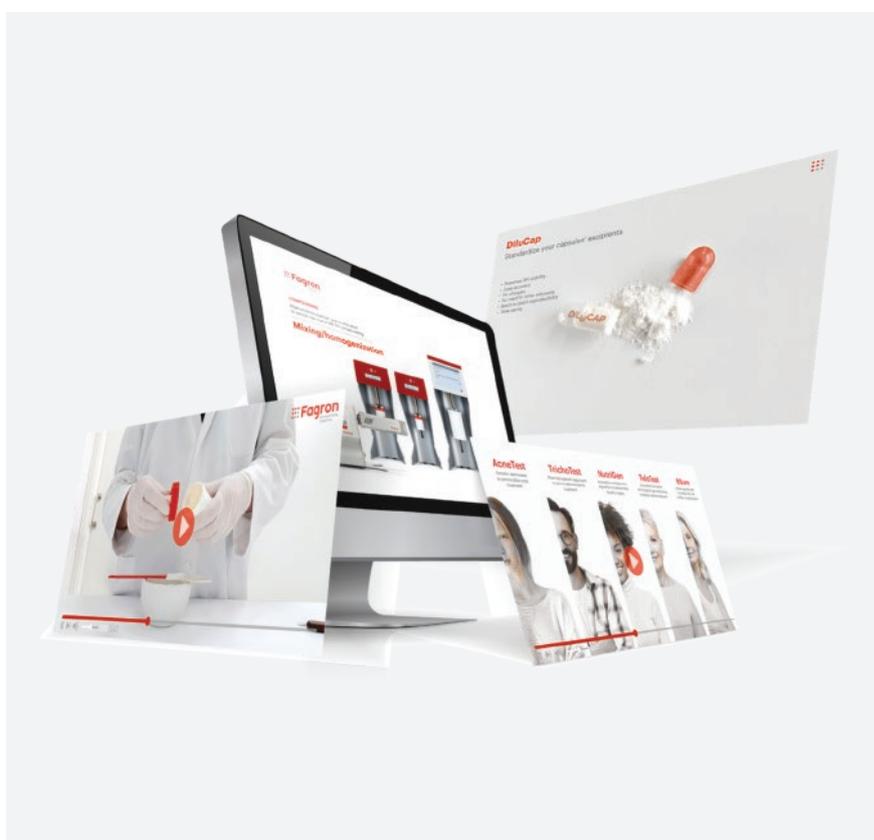

Fagron's Video Platform is a global initiative on learning and education through an online platform. It offers reliable and relevant content generated by an extensive network of experts and collaborators, providing the unique opportunity to **learn the latest on pharmaceutical compounding** and its application in the personalisation of treatments from the market leader.

## The Courses

Central to Fagron's philosophy is the belief that compounding and personalisation of medicines go hand in hand. The Video Platform is set to provide scientific and up-to-date educational content in a wide range of medical areas:

- Dermatology
- Endocrinology
- Paediatrics
- Gynaecology
- Nutrition
- Genomics
- Pharmaceutical Technology

and many more.

### The Teachers

Fagron has over 3,000 employees, with more than 200 pharmacists and healthcare professionals. Together with an external team of experts such as medical doctors, nutritionists, pharmacists and more, we have an extensive network of renowned professionals providing the most up-to-date contents in the field of personalised medicine.

Our content programme is constantly updated and carefully curated by a multidisciplinary team of experts, offering different levels of education, with a balance between practical and theoretical courses for prescribers, pharmacists, students, patients and anybody curious about the role of modern pharmaceutical compounding in personalised medicine.

Visit our video platform at:

### What We Offer

At Fagron Academy, we provide comprehensive training designed for both compounders and prescribers/medical doctors, with a focus on personalized medicine. Our platform bridges the gap between the prescription aspect and the compounding aspect of personalised treatments.

We constantly update our training content to ensure you receive the highest quality education. Our goal is to help you excel in your profession, whether you are enhancing your compounding skills or deepening your clinical expertise.

- Learn from industry leaders
- Expertise in live and online education
- Wide range of courses
- Comprehensive topics for doctors and pharmacists:
  - Dermatology
  - Gynaecology
  - Nutrition
  - Pharmaceutical technology
  - and more.

# Marion Gluck Training Academy

Empower your  
practice with  
expert hormone  
training.

The Marion Gluck Training Academy, established in 2016 by Dr. Marion Gluck, is a premier UK institution dedicated to educating healthcare professionals in Bioidentical Hormone Replacement Therapy.

In 2024, the academy was acquired by Fagron, the global leader in pharmaceutical compounding.

This strategic acquisition enhances the academy's mission to provide **comprehensive training in hormone balancing therapies**, equipping practitioners with the expertise to address a wide range of hormonal imbalances effectively.

---

## Structured learning journeys for healthcare professionals

### 1 Foundation Course in Women's Health

An e-learning course designed to provide a basic understanding of women's health, hormonal roles and current menopause diagnosis and management.

### 2 Introduction to BHRT Therapy

An introductory course developed by Dr. Marion Gluck, offering insights into the role of hormones and the application of BHRT in clinical practice.

### 3 Developing Your BHRT Knowledge

Aimed at further developing practitioners' knowledge with additional hormone therapies and delivery methods.

### 4 Integrative Men's Health

A one-day course exploring personalised approaches to male ageing, covering TRT, DHEA, clinical risks and integrative strategies including nutrition, supplements and genetics—guided by the 4P medicine model.

### 5 Thyroid Masterclass

An accredited live online course designed for practitioners, this course provides essential knowledge in diagnosing and treating thyroid disorders, with a focus on both licensed and unlicensed options. It's perfect for those who've completed Courses 1 and 2, helping to fill the knowledge gap in thyroid health within women's care.

# Marion Gluck Clinic

## Personalised care for hormonal health and wellness.

The Marion Gluck Clinic, renowned for its expertise in bioidentical hormone replacement therapy and personalised hormonal health, was acquired by Fagron, the global leader in pharmaceutical compounding, in 2024.

Following Dr. Marion Gluck's retirement, the clinic continues to operate under Fagron's ownership, upholding its legacy of excellence in hormonal care. The clinic specialises in **treating hormonal imbalances** across a wide range of conditions, including menopause, andropause, thyroid disorders and fertility issues.

In addition, it offers advanced treatments in longevity, weight management, skin health and functional medicine, focusing on a holistic, integrative approach to health.

With a highly skilled team of medical professionals, the clinic remains dedicated to providing tailored treatments based on the latest scientific evidence, ensuring optimal patient well-being and quality of life.

---

## Consultation Types

### 1 Initial Consultation

A comprehensive assessment to discuss symptoms, medical history and treatment options.

### 2 Follow-up Consultation

Ongoing appointments to track progress, adjust treatments and address concerns.

### 3 Online Consultation

Virtual appointments for patients seeking remote consultations or follow-up care.

### 4 Repeat Rx Service

If you've consulted with a MGC doctor in the last 12 months and are content with your current treatment plan, you may utilise this streamlined service to request a prescription refill.

# Ingredient Inventory

This inventory represents our standard stock of ingredients and is reviewed and updated regularly. Items may be added or removed based on availability, and all listed ingredients are subject to change without prior notice. If a required ingredient is not included in this list, please contact us directly to discuss potential sourcing options tailored to your specific needs.

17-alpha-Estradiol	Chromium	Ketoprofen	Pregnenolone
7-Keto-DHEA	Chrysin	Kojic Acid	Progesterone
Acetaminophen	Citric Acid	Lactobacillus acidophilus	Propranolol
Akkermat™	Clindamycin HCl	Lactiplantibacillus plantarum	Prostaquinon
Alpha Arbutin	Clobetasol Propionate	Latanoprost	Pyridoxine HCl
Amantadine	Coal Tar Solution	L-Carnitine	Quercetin
Amitriptyline HCl	Copper Glycinate	Levothyroxine Sodium	Resveratrol
Amphotericin B	Cyproterone Acetate	L-Glutamine	ResviTech™
Arginine HCl	Dapoxetine	Lidocaine HCl	Salicylic Acid
Argireline	Dapsone	Liothyronine Sodium	SAM-e
Artichoke Dry Extract	Dexamethasone	L-Isoleucine	Selenium Yeast
Ascorbic Acid	DHEA	L-Leucine	Sildenafil Citrate
Atenolol	Diclofenac Sodium	Loratadine	Simvastatin
Azelaic Acid	Doxycycline	Lycopene	Sirolimus
Azithromycin	Dutasteride	Maca Root	Sodium Hyaluronate
Baclofen	Enalapril	Melatonin	Spirinolactone
Benzocaine	Estradiol	Metformin	Spirulina
Betacarotene	Estriol	Methionine	Sulfur
Betaine HCl	Famotidine	Methylene Blue	Tacrolimus
Betamethasone Dipropionate	Fenugreek Seed Extract	Metronidazole	Tadalafil
Betamethasone Valerate	Ferulic Acid	Miconazole	Taurine
Bifidobacterium adolescentis	Finasteride	Minoxidil	Testosterone
Bifidobacterium infantis	Fluconazole	Monobenzone	Tetracaine Base
Bifidobacterium longum	Fludrocortisone Acetate	Motility™	Tetracaine HCl
Biotin	Fluoxetine HCl	N-Acetylcysteine	Tetracycline
B-Nicotinamide Adenine Dinucleotide	Folic Acid	Naltrexone HCl	Tranexamic Acid
Boric Acid	Glucosamine Sulfate	Natural Dessicated Thyroid	Tretinoin
Bromelaine	Glutathione	Niacin	Vardenafil
Cafeisome Liposome	Glycerol	Niacinamide	Verapamil HCl
Caffeine	Glycine	Nystatin	Vitamin A
Calcium Pantothenate	Gotu Kola	Omega-3	Vitamin B2
Cetirizine HCl	Grape Seed Extract	Oxytocin	Vitamin D
Chlorella	GreenSelect™	Paroxetine	Vitamin E
Chlorphenamine Maleate	Hydrocortisone	Permethrin	Vitamin K2
Cholesterol	Hydroquinone	Piroxicam	Wheat Germ Oil
	Isotretinoin	Pomegranate Dry Extract	Zinc Gluconate
	Ketoconazole	Prednisolone	Zinc Oxide
